## **ZAUTOMATYZOWANA LAKIERNIA PROSZKOWA**

**AUTOMATED POWDER COATING LINE >> AUTOMATISIERTE PULVERBESCHICHTUNGSANLAGE**

Mistal Color to nowoczesna lakiernia proszkowa, która wyróżnia się wieloetapową obróbką chemiczną z zastosowaniem pasywacji tytanowo-silanowej – bezchromowej technologii zwiększającej odporność na korozję i przyczepność lakieru. Używamy wody DEMI, automatycznej kabiny dopasowującej się do kształtu detalu oraz pieca z wymuszoną cyrkulacją powietrza. Gwarantujemy trwałość i perfekcyjne wykończenie.

Mistal Color ist eine moderne Pulverbeschichtungsanlage, die sich durch eine mehrstufige chemische Vorbehandlung mit titan-silanbasierter Passivierung auszeichnet – einer chromfreien Technologie, die die Korrosionsbeständigkeit und die Haftung der Beschichtung deutlich erhöht.

Wir verwenden DEMI-Wasser, eine automatische Kabine, die sich an die Geometrie des Bauteils anpasst, sowie einen Ofen mit erzwungener Luftzirkulation. Wir garantieren Langlebigkeit und eine perfekte Oberflächenqualität.

Mistal Color is a modern powder coating line distinguished by a multi-stage chemical treatment using titanium-silane passivation-a chrome-free technology that increases corrosion resistance and paint adhesion. We use DEMI water, an automatic cabin that adjusts to the shape of the part, and a furnace with forced air circulation. We guarantee durability and a perfect finish.

# KSIĄŻECZKI 3,5mm i 4,5mm

DOPASOWANE DO NOWYCH STANDARDÓW RYNKOWYCH

W odpowiedzi na pojawiające się na rynku panele ogrodzeniowe wykonywane z cieńszego drutu, wprowadziliśmy nowe warianty książeczek montażowych do drutów o średnicy 3,5mm oraz 4,5 mm.

Pozwalają one na precyzyjne spasowanie z nowymi typami paneli, zapewniając stabilne i pewne mocowanie.

Nowe rozmiary uzupełniają dotychczasową ofertę 3, 4, 5 i 6mm, tworząc kompletną linię produktów, która umożliwia dobór właściwego elementu dla każdego typu panelu.

## 3.5mm and 4.5mm BRACKETS

ADAPTED TO NEW MARKET STANDARDS

In response to the emerging fence panels made from thinner wire, we have introduced new variants of mounting brackets for wires with diameters of 3.5 mm and 4.5 mm. They allow for precise fitting with the new panel types, ensuring stable and secure fastening. The new sizes complement our existing range of 3, 4, 5, and 6 mm, creating a complete product line that enables selecting the right component for any panel type.

## 3,5mm und 4,5mm KLEMMBÜCHER

ANGEPASST AN NEUE MARKTSTANDARDS

Als Reaktion auf die auf dem Markt erscheinenden Zaunpaneele aus dünnerem Draht haben wir neue Varianten von Montage-Klemmbüchern für Drähte mit Durchmessern von 3,5 mm und 4,5 mm eingeführt. Sie ermöglichen eine präzise Anpassung an die neuen Paneltypen und gewährleisten eine stabile und sichere Befestigung. Die neuen Größen ergänzen unser bestehendes Sortiment von 3, 4, 5 und 6 mm und bilden eine vollständige Produktlinie, die die Auswahl des passenden Elements für jeden Paneltyp ermöglicht.

**MONTAŻ LAMPKI:** Podłącz przewód zasilający do lampy - nie jest wymagana polaryzacja. Przed osadzeniem lampy zaleca się sprawdzić jej działanie, podłączając kontrolnie zasilanie - pozwoli to uniknąć konieczności demontażu w przypadku ewentualnej usterki.

**LAMP INSTALLATION:** Connect the power cable to the lamp - polarity is not required. Before inserting the lamp, it is recommended to test its operation by briefly connecting the power supply. This helps avoid the need for disassembly in case of a malfunction.

**MONTAGE DER LEUCHTE:** Schließen Sie das Versorgungskabel an die Leuchte an - eine Polarität ist nicht erforderlich. Vor dem Einsetzen der Leuchte wird empfohlen, deren Funktion durch einen kurzen Anschluss an die Stromversorgung zu überprüfen. So lässt sich ein späterer Ausbau im Falle eines Defekts vermeiden.
